

**A Better Paint Solution,
A Better Business Solution**

protecting Protecting your Investment

Your commercial vehicle and industrial clients have a heavy financial investment in their equipment.

It is important, therefore, that you provide them with the highest quality and most cost effective CV refinishing service.

The Spies Hecker CV System provides the products and processes you need to ensure total customer satisfaction.

A comprehensive range of refinish choices, extended product technology, superior colour matching capabilities, and, of course, superb Spies Hecker quality – all contribute to a system flexible enough to take on any job with confidence and to provide your customers with the colour accuracy, operational durability and value for money they demand.

flexible A Flexible Solution

Special skills and technology are required to ensure that CV paint finishes stand up to particularly severe conditions, that they comply with the requirements of the fleet owner and that vehicle down-time is minimised.

The Spies Hecker CV System is a comprehensive and compatible range of products and technical support items built around four basic product groups:

PERMAFLEET: 2K Acrylic Urethane for high standard refinish work

PERMACRON: Series 257 for best quality solid colour refinishing. Series 293/295 Clear Over Base for fast turnaround, multi striping and exotic pearl & metallic effects.

PERMANAL: Synthetic enamel for high gloss general purpose finishes.

PERMAFAST: Quick dry enamel for speed and economy on non-critical parts.

If required, Spies Hecker can assist in identifying the most suitable specification for your project to ensure that economy, accuracy, speed and productivity goals are met and that you stay ahead in a competitive market.

investment

Preparation

It's the products you can't see (primers, hardeners, reducers etc.) on the finished job that, nonetheless, have a significant influence on the quality of the final paint finish.

The Spies Hecker CV System is backed by the most comprehensive range of primers and other preparation products on the market today. CV System primers and ancillary products are formulated specifically for large vehicle refinish applications, to provide optimal fill, flow and sandability characteristics and produce the perfect base for a perfect finishing coat.

The Spies Hecker CV System covers every single application and performance criteria that you require. Whether it is wet on wet, heavy filling, etch or general priming, we have the product for the job at a price to suit.

Permafleet

The Permafleet 2K Acrylic Urethane range provides a comprehensive system of products for general CV applications where a high quality finish is required. The wide product choice in the Permafleet range allows the Refinisher to tailor the paint process to the specific job at hand.

Other important features of the Permafleet CV System are excellent colour range, high gloss and durability properties. The ability to customise the product mix to suit varying environmental conditions at the time of application and varying job requirements is available through the range of Permafleet specific products.

Permacron

The Permacron Series 257, 293 and 295 are the stars of the Spies Hecker CV System. For those jobs requiring a premium finish, these products produce an extremely high quality solid colour or COB gloss finish with optimal performance and durability and economical, ongoing fleet maintenance costs.

The Permacron range is supported with an excellent CV colour data base for exceptional colour consistency and more accurate colour matching for corporate livery duplication and general fleet work.

The Permacron Acrylic Urethane Series 257 is the finish of choice for all high quality commercial vehicle solid colour applications. Permacron Basecoat Series 293 and 295 also provides a premium COB finish option for fast turnaround multi-stripping, metallics, pearls and special effects.

Permanal

Permanal Synthetic Enamel Series 360/363 is a quality spraying enamel providing high gloss and economical cost for general commercial vehicle, agricultural and earth moving equipment refinishing. It produces a superior quality finish when compared to Permafast Quick Dry enamel.

Permanal exhibits good durability, and metallic and matt finishes are available.

Mixed colours can be used with or without Permafast Quickdry Enamel Hardener depending upon specific requirements and desired performance on finish.

solutions

Permafast

Permafast Quick Dry Enamel Series 380/383 is designed for chassis, wheels, machinery and agricultural equipment finishes where speed of drying and economy are the critical factors.

Permafast exhibits good gloss and an excellent range of colours is possible, including metallic and matt finishes.

Mixed colours can be used with or without Permafast Quick Dry Enamel Hardener depending upon specific requirements and desired performance of finish.

customised

A Customised Solution

No two commercial vehicle refinish jobs are the same. Different chassis, different bodies, different loads to carry, different driving conditions to cope with, different special colour requirements. The flexibility and compatibility of products in the Spies Hecker CV System, plus a comprehensive range of tinters, means that you now have the ability to customise the system to suit any specific application requirements, any particular colour specifications or to meet any budget.

Spies Hecker technical staff are happy to provide recommendations on paint specifications and application processes to assist you to optimise the quality and cost effectiveness of your CV work.

A crucial part of the Spies Hecker CV System is to provide comprehensive and accurate data on corporate livery specifications for the Refinisher's reference when refinishing vehicles for specified companies. On the Refinisher's behalf, Spies Hecker can source the information from the fleet owner, co-ordinate the data and produce master specification sheets depicting the correct use of logos, design styles and colours, to cover the company's complete range of vehicles.

The Complete Corporate Fleet Livery Programme

Your clients' logos and corporate liveries are their prime means of communication to their markets and represent a huge investment in time, money and marketing effort. It is your responsibility to ensure that these corporate standards are maintained.

Spies Hecker can assist your clients in integrating the elements necessary to ensure that their commercial vehicle fleet is painted, imaged, repaired and maintained to first class conditions and within their corporate guidelines. FleetSmart Fleet Graphics brings together the product, skills and experience of leading suppliers to ensure your client's commercial fleet looks its best and stands the rigours of day to day operation. Combine the ability to design and provide concept layouts for new or re-liveried vehicles and FleetSmart Fleet Graphics becomes the logical choice for fleet imaging management.
